This is a sepal-peloric Cymbidium Radiant Ruby 'Aussie Gem'

Most peloric flowers show changes between the lip and the petals, where colors or other traits of the lip are expressed on the petals. Its not uncommon and can be found in nature. However genetic mutations can also occur causing pelorism between the lip and the sepals. Often this arises as a mutation in the meristem process, it very rarely, if ever, occurs naturally. Cymbidium aficionados are familiar with the breeding lines for sepal-peloric plants arising from Cym. Cleo's Melody 'Freakout'. The late Loren Batchman especially liked sepal peloric Cymbidiums. But this hybrid has no Cleo's Melody in its background at all. Indeed, a quick google image search will show many pictures of Cym. Radiant Ruby, all with typical petals and sepals. Which makes this one a happy find for its owner Randall Robinson of Melbourne, Australia who works at Victoria University.

DVOS is moving in 2015

Our current meeting place, the Contra Costa Water District Board room, will not be available to us next year due to earthquake retrofitting. Beginning in

January, we will meet at the newly rebuilt Pleasant Hill Community Center in the McHale Room. Some of you will remember this as the location where we held our Fall Show for many years prior to the rebuild.

In addition to changing our location, we will also be changing from the second Thursday to the third Thursday of each month. The Community Center is located at 320 Civic Dr. in Pleasant Hill (near the Police station and the YMCA.)

Want to be a Board Member ?

Help decide the direction of DVOS.

The Club benefits when more people are willing to help with the decisions about speakers and events. Call Eileen Jackson (2014 president) or any board member, to let them know you would be willing to serve as a board member in 2015.

Not only is it a great function for learning, it is also an excellent time to visit with old friends and to meet new Orchid Friends! So, come join us in Florida.

Check out both our website www.aos.org (under the Fall Meeting tab on the home page) and www.slippersymposium.com for full details.

The webinars are a great way to learn about Orchids from the comfort of your home. On August 21st at 8:30pm EDT, Lois Cinert will host "Phragmipedium Species and Hybrids."

**This one is for Members only, so if you aren't a member yet, now's the time to join and with the new digital membership of only \$40, it's a steal!

If you cannot join us on this date, keep in mind that all of the webinars are recorded and can be found on the website for listening whenever it's convenient for you.

I always learn something new in every issue of Orchids Magazine. This month's issue has an interesting letter written to our resident expert Thomas Miranda, on how to keep up humidity in your growing area. Meena Divakaran has a couple of great ideas, she places carpet padding on her benches and also hangs burlap with a soaker hose, which sound like great ideas to me.

I personally don't own any Miltoniopsis, but David Rosenfeld's article and the beautiful photos, also found in this month's magazine, have convinced me that I should give them a try. He covers everything from the history to the culture, so check it out!

In keeping with the "Hot" theme this month...Did you know that we have a monthly checklist on the website (Just look under the All About Orchids heading tab)? It provides great information for the major genera, with info on how to deal with the dog days of summer.

We have rented a booth at the street fair in Pleasant Hill.

This is our best shot at recruiting new members. We will have a display, plants for sale, and a new membership drive.

We need your help for this event to be a success. Please plan to help us set-up, clean-up, and man the booth for a few hours on one of these days. There will be signup sheets at the September meeting.

There is a Facebook page called 'Wardian Cases, Orchidariums and Vivariums' for hobbyists interested in growing indoors and under lights.
