

JUNE 2013

Diablo View Orchid Society

www.DVOS.org a 501 (c) (3) corporation

DVOS meets the second Thursday of each month at the
Contra Costa Water District boardroom 7:30-10:00 pm
1331 Concord Ave. Concord, CA.

AT OUR NEXT MEETING:

Mary Nisbet from California Orchids will be our speaker

PLANT TABLE PROVIDED BY:

California Orchids

BOARD MEETING:

*The next board meeting will be on
June 20 at the home of
Brad and Karen Piini*

SPEAKER'S DINNER

BEFORE OUR NEXT MEETING

AT 5:30 PM:

*Sichuan Fortune House,
41 Woodsworth Lane,
Pleasant Hill*

Cuitlauzina pendula

AT OUR NEXT MEETING JUNE 13

Mary Nisbet is the owner of California Orchids in Bolinas and has been growing orchids since 1978. She got started at McLellans' where she spent 3 1/2 years as a Paph grower and was exposed to commercial growing, judging, hybridizing, and many other aspects of the orchid world.

Next, she moved on to a shared greenhouse in Daly City, where she began boarding orchids. During that time, she drove up and down the coast for a year trying to figure out how to purchase land and build a nursery. In 1987, she discovered a decrepit old Fuchsia nursery in Bolinas that "no one on earth but me would see as a dream come true." Mary is delighted that, with endless effort and many orchids later, she's been able to spend her working life with the remarkable plants we know as orchids.

At her nursery in Bolinas, Mary has several large cork oak logs upon which she has mounted a great variety of orchids and allows them to grow as they do in the wild. If you've never seen them, don't miss her next open house. As with previous speakers, Mary will introduce a number of her plants and speak about how she grows them and helps them thrive.

*Members can pre-order plants and Mary will bring them to our meeting:
<http://californiaorchids.com>*

AT OUR MAY MEETING: MARNIE TURKEL

To get to the root of the problem, you may need to literally get to the roots. If you haven't learned this lesson already, you will in time as you raise orchids. A lot of raising orchids is in the care of the roots of the plants. You will find that if the roots of the plant are happy, then the plant will be happy.

Marni Turkel made this point in her May talk to the Diablo View Orchid Club. Marni specializes in raising cool growing orchid miniatures. She has three greenhouses each of which maintains a distinct temperature range. The difference in Marni's greenhouse temperature range is that she sets the temperature range based on how cold the greenhouse is allowed to get at night not on how warm it gets in the day. Marni believes that this night time temperature is the most important factor in growing orchids. Her three greenhouses are regulated at three different temperature ranges. The first has a minimum cold temperature of 45 degrees at night. The second can get as low as 50 degrees at night. The third greenhouse gets no cooler than 56 degrees at night. Marni stresses that these are the minimum temperatures that the roots are allowed to experience, not the maximum. The root temperature is more important than the temperature of the top of the

Marni also pays special attention to the roots when watering. Marni believes that the roots are the basis of the plant and need special care when watering. When she waters, she always runs a wetting agent in with her fertilizer. This ensures that the roots will soak up the water and fertilizer compound. Marni uses Coco Wet, which acts like a soap and allows the roots to become more permeable to water and allow better uptake.

plant. If an orchid plant is still unhappy in the warmest greenhouse (56 degree night time temperature) then Marni uses root heating mats. These mats are 2 feet by 4 feet and use 80 watts of energy. They will heat the roots to 70° F and will effectively fool the plant into thinking it is in a warm environment and the plant will thrive.

When Marni gets a new orchid, the first thing she does is look up the elevation that the plant is native to. This will tell her what the minimum temperature range is for that orchid and in which greenhouse that plant should be placed.

Miltonia Bert Field

Marni finished her talk by discussing the control of common pests that affect her orchid collection. Marni's main pest is the bush snail. These snails eat the root tips of orchids. To treat for this she uses Slugfest, a 25% metaldehyde solution. She also uses Sevin, which is carbaril and affects the snails digestive system. Many times she uses both of these in combination. For thrips she uses Avid, which is a miticide. For the control of ants she uses Terro powder or liquid. For scale she uses Merit and for mealybugs she uses Bayer 3-in-1. For mealybugs and aphids she also uses Safari.

Thank you Marni for the energetic and informative talk.

AOS NEWS

Lynn Fuller, Chair AOS Affiliated Societies Committee

Updates from AOS Headquarters

- Save the date – November 14-16, 2013 -- for the Fall Members and Trustees meetings to be held at the new AOS home at Fairchild Tropical Botanic Gardens in Coral Gables, Florida. Plans are underway for speakers and a show and as information becomes available, I'll pass it along. Having the fall meeting there provides us all perfect opportunity to visit Fairchild Tropical Garden - one of the top two tropical gardens in the world.
- Changes to Orchids production. Jim Watson, the long-time editor of Orchids, has left due to budgetary constraints of the AOS. Ron McHatton will be taking over Jim's editorial roles in conjunction with the Publications Committee.
- The Veitch Memorial Medal Recipients. Peter R. Furniss and Dr. Alec Pridgeon, Ph.D. were among six individuals honored with the The Veitch Memorial Medal by the Royal Horticulture Society. The Veitch Memorial Medal may be awarded annually to persons of any nationality who have made an outstanding contribution to the advancement of the art, science or practice of horticulture. For more information on the recipients and the award, see the AOS website.
- 13th Supplemental Issue for 2013. The 2013 supplemental issue will be distributed with a Fall issue of Orchids magazine and the topic is the genus Cattleya. Donations (however small - \$2.00 minimum) are now being accepted on the AOS website. The publication of these supplemental issues is underwritten entirely by membership donations.

Throughout the remainder of the spring and summer, I hope you all will support your local societies' events and shows.

UPCOMING SPEAKERS AND EVENTS

Cym. Dorothy Stockstill

- June 13: DVOS meeting 7:30 - Mary Nisbet will talk about "What's in Bloom"
- July 11: Orchid Comedy Hour
- August: Annual DVOS Picnic and Auction!
- Sept. 12: Fred Clarke
